561-12006	Optional basic controller
561-12007	Optional advanced controller
561-2201	Optional vehicle specific hook kit

Integrated Safety Director Option Available The LED Safety Director is a built in warning system designed to direct traffic approaching from the front, rear or both directions of a stationary vehicle. Between 6 and 10 LED modules (front and rear) can be selected to display the Safety Director patterns by turning the existing flashing modules into dedicated Safety Director modules. These patterns can be selected through the Advanced Controller.
